Swe 363 – Assignment 4

live

demonstration

Technical Architecture

- Front-end-only React single-page application
- Bundled using Vite
- Uses GitHub REST API
- Deployed using Vercel

Technical Deep Dive

Most Challenging Aspects

- AI cannot really keep up with conditions
- Accumulating useless code snippets

Lessons learned

- How to effectively engineer prompts
- How to judge the quality of the code generate

Conclusion

Outcomes:

- Built a well designed portfolio
- Practiced web development skills
- Integrated AI into development

Future improvements:

- Implementing a backend
- Upload projects to GitHub
- Link projects to their repositories

Thank You
